Final Project Description and Documentation

Screen1: Main Screen
Included the Restaurant's picture, welcome text, and restaurant's open hour.
Clicking on Start Order button to get started ordering food, and it will jump to the Food
List page.

Screen2: Food List screen
Showed all the food items available for ordering in restaurant. Clicking on the item, it will send
the item name to detail page and it will jump into the item detail page. Since the limited time
and it is a individual work, I only include the detail page for the first item.
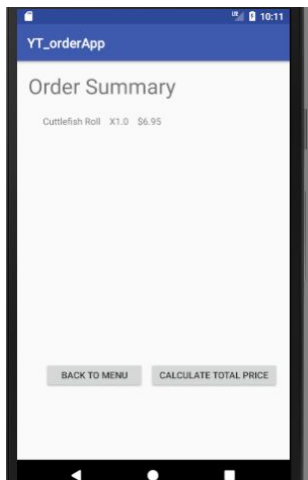

Screen3: Item Detail screen

Included item's picture, name, unit price, size, ingredients, and changeable quantity. Clicking on Add to order button, it will send the item's name ,quantity and item total price which calculated by unit price times quantity. It will also jump into the Summary page.

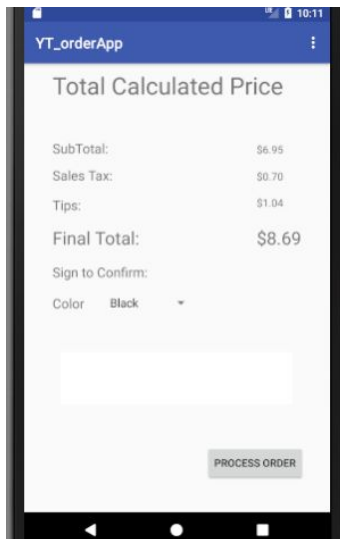

Screen4: Summary Screen

Included the all added item information into a list. Clicking on Back to Menu button will forward you to menu page, and you can start a new selection. Clicking on Calculated Total price, it will jump into Calculated Total price page and it will also forward the total price of all item in the summary list.

Screen5: Final Total Price Screen
Included the price of subtotal, sale tax, tips, and final total. It also included the Signature sign place which generated by using touch input API. Clicking on process order button, it will jump into the complete page.

Screen6: Complete page
Included thank you message and order completed message which showed by using 2D drawing API.
